## Dr. Parkhurst

On the Lawe We Make.

Believes the World is Moving Forward to a More Stable Condition, but Over a Rocky Road.

HISTORY is a series of experiments. Nations scarcely are aware of what they want, and hardly more do they know how to get it.

We make laws, fit them into the machine of public life, run the machine long enough to see how it will go with them, then take them out and do some more fitting, never certain how a law or a policy will work till we try it out.

We passed the Sherman anti-trust law. A good deal of brain was put into the attempt.

It broke down and lay for years a helpless mass of mechanism like a gigantic borer that was constructed to pierce Hoias mountain in the '80s, and which was shattered in the first revolution.

The Sherman law was taken to the supreme court for repairs a year ago and the court is just now experimenting with it in its mended shape.

The final verdict of the experts is not yet rendered.

China began with monarchy, broke under its own weight and the people are at present happily experimenting with democracy. Spain did the same thing and has gone back again to monarchy.

The situation in Mexico is not to be commented on.

Balfour says the irresolution and unsteadiness of the condition in England is almost without precedent in British history.

Doubtless we are all moving in the direction of more stable conditions, but no nation knows what is best for itself and can only fumble its way through a maze of alternatives.

United States is passing through a Revolutionary Like Period.

We here in the States are also passing through a period that has in it a revolutionary flavor.

We like our governmental machine; it has stood us in pretty good stead for a century and a quarter, but it needs some and is pretty hot in some of its bearings.

Mr. Roosevelt is distinctly of the opinion that it should be repaired.

Every opinion that has in it an element of truth should be openly ventilated. He wants government administered after the pattern of the old-fashioned New England town meeting, where every man is as good as any other man.

That is, he wants a pure democracy as opposed to a representative democracy. He wants every citizen to be a ruler.

Mr. Taft thinks that inasmuch as there are a great many questions upon which the mass of us are not qualified to reach a safe opinion, it is better for the general interest that our individual sovereignty should not be extended farther than the selection of such men to represent us as are better qualified than ourselves to do so.

That is the policy we are apt to pursue in most practical matters of our own. If, for example, I want to build a house I do not call into conference all the men who live in my neighborhood but select for my architect a man who has had more experience than most in the art of building a house.

That is the policy we are apt to pursue in most practical matters of our own. If, for example, I want to build a house I do not call into conference all the men who live in my neighborhood but select for my architect a man who has had more experience than most in the art of building a house.

That is the policy we are apt to pursue in most practical matters of our own. If, for example, I want to build a house I do not call into conference all the men who live in my neighborhood but select for my architect a man who has had more experience than most in the art of building a house.

That is the policy we are apt to pursue in most practical matters of our own. If, for example, I want to build a house I do not call into conference all the men who live in my neighborhood but select for my architect a man who has had more experience than most in the art of building a house.

That is the policy we are apt to pursue in most practical matters of our own. If, for example, I want to build a house I do not call into conference all the men who live in my neighborhood but select for my architect a man who has had more experience than most in the art of building a house.

erection as myself and all my neighbors combined.

All I intended to say is that we are not to be dogmatic about our matters, but keep mind that fosters in them a decided conviction as to which of the two is most likely to promote the well being of all parties and the interests of all men.

The principal reason why as much of our discussion—religious, political and otherwise—is unprofitable is that we argue more for the purpose of proving our own position than with view to improving our position and ascertaining the truth.

Belief That Opinion Is Truth Blocks Our Knowledge.

We come of us object to the doctrine of the infallibility of the pope, quite unconscious that we are practicing it in the very thing we are so good of the same prerogative that is accorded to him.

An opinion is at best only an approximation to the truth except perhaps in what is called exact science, and rather commonly are as unlike the truth as the clouds are to the sun.

The only man whose convictions can be trusted is the one who has a measure of distrust in them himself, and who feels that they will have to grow some before they will be trustworthy.

The true philosopher is more likely to be found upon his knees than strutting about in the armor of his wisdom, arrogantly dispensing his homilies.

Most of the questions that we discuss have a personal interest in, so that our intellect is unable to work without being twisted out of line by the confessions of our feelings.

We generally find what we call reasonable grounds for believing what we want to believe.

When, as in the case of a mathematical problem, it makes no difference to us what the answer is, we can gradually approach the truth by a process of elimination, and all mathematicians will arrive at the same answer.

There is no such method in the case of "progressives" and no "conservatives." One cannot argue soundly till he has his feelings to shield.

On the contrary, both in politics and in religious matters, discussion is usually conducted at a pretty high temperature, which vitates the whole process.

Attacks on Convictions Taken as Personal Assaults.

In addition to that we become in time so enamored of our opinions that we regard them as part of our personal property, so that for an attack to be made upon them affects us quite as though it were an assault made upon our person.

There is no such argument can be offered in excuse by the women who cause birds to be slaughtered by the millions for their own use.

Tell your milliner, dear lady, to fashion you the most exquisite hat possible out of nature's and art's inimitable articles.

Suggest ideas to her, and endeavor to produce something which shall have upon her broken into and destroyed, and that human beings need their skins to keep them from the cold.

But no such argument can be offered in excuse by the women who cause birds to be slaughtered by the millions for their own use.

Tell your milliner, dear lady, to fashion you the most exquisite hat possible out of nature's and art's inimitable articles.

Suggest ideas to her, and endeavor to produce something which shall have upon her broken into and destroyed, and that human beings need their skins to keep them from the cold.

## FARMING

### HARMONY MEETING OF FARMERS HELD

The Ft. Sumner Cantaloupe Growers Contract for 250 Acres.

Fort Sumner, N. M., April 11.—Harmony characterized the meeting of the Fort Sumner Cantaloupe Growers' association, at which J. W. Slattery, of Chicago, representing the John Nix & Company of New York and Chicago, A. A. Scott, traveling agent for the Santa Fe Refrigerator Dispatch company, and A. Cameron, assistant division freight and passenger agent, of the Santa Fe railroad, were present, for the purpose of making arrangements for the handling of the season's crop.

The growers signed contracts for about 250 acres of cantaloupes, to be grown in the seed valley of Fort Sumner, with Mr. Slattery, to be handled by the John Nix company.

An appeal will be made by the growers here to bring the crop on at about the 15th of July, as this will insure them an open market; will put the Fort Sumner cantaloupes on the market between the early Arizona melons and the somewhat late Colorado product, which will mean that the Fort Sumner melons will probably bring top notch prices.

George E. Mann, who is developing about 150 acres under the John Taylor project, has already planted over 2,500 fruit trees, mostly Stark's apple, and expects to put in about 1,000 more, as well as a good sized maple grove, which will have from 10 to 12 cars of celery, and a large acreage of sweet potatoes.

Mr. Mann has just completed the erection of a very beautiful and elaborate dwelling on his place, and anticipates making further improvements in the near future.

### SMUDGING SAVES FRUIT AT ROSWELL

Those Who Failed to Use Smudge Pots Lost Their Best Fruit.

Roswell, N. M., April 11.—Peaches, pears and plums are gone where the horticulturist did not take the precaution to smudge. The apples are not in danger unless a serious damp freeze visits the orchards.

The thermometer went down to the smudge mark and many pots were lighted, but serious danger is not anticipated, as it was cloudy and the wind blew a greater part of the night.

Dr. Frank N. Brown, of Hill Crest orchard, the fanciest peach orchard in this vicinity, has been smudging regularly and the weather the past week has been serious enough for him to make many practical smudge pot demonstrations.

He commenced smudging when the thermometer stood 31 degrees and it kept gradually dropping until it stood at 22 degrees outside of the smudging district. This reading was from a government thermometer, the tested thermometer stood at 21 degrees.

Dr. Brown used 50 Hamilton pots to the acre, smudging an area of four acres of peaches, plums and pears. In the heated area the thermometer stood at 31 to 32 degrees while the outside was 21. This shows the decided advantage of the smudge pot, says the doctor, and emphasizes the importance of the people thoughtfully equipping their places for protection.

While Dr. Brown has saved his fancy crop by smudging the past week, other peach, pear and plum growers will be a great extent lost their crop. One large grower did not buy his oil till this week.

### MANY GRAPE VINES PLANTED NEAR PECOS

One Farmer Puts Out 250 Grape Vines and 90 Fruit Trees.

Pecos, Texas, April 11.—Hall Harrison, president of the new irrigation farmers' association, one of the new pumped water irrigation fields near this city, located three miles from Pecos, has completed a large amount of cumulative work on his place, including the planting of 250 grape vines and 90 fruit trees.

He has planted cedar trees all around his place, completing planting practically all his alfalfa and canning stock and a big effort is to be made to win first prize for a Reeves county farmer in the final close. Col. Harrison is a big moving spirit in the congress, is to be invited to make an address in this city this summer at the annual meeting of the Pecos Melon Growers' association.

### TO CULTIVATE HALF OF BIG LAND TRACT

Plainview, Texas, April 11.—Charles Saitling, who owns about 1,500 acres of land here, has been planning to plant alfalfa and stock-raising in Hale county, reports that he is planning 1,500 acres this year to oats, millet, alfalfa, maize and Kaffir corn. Soil and water are good and he is planning 1,500 acres this year to oats, millet, alfalfa, maize and Kaffir corn.

Mr. Saitling reports that this portion is holding good all over the country.

Saitling is the man who is claimed to have bested the state last year in an oat yield without irrigation. His 50 acres averaged approximately 70 bushels per acre and brought a price of around 70 cents per bushel.

A second crop of silos within a week has been ordered by Hale county farmers. The order ran: Carl Goodman, 2; These parties, 2; Hermann Schultz, 2. These parties are planting silos, which is on the Santa Fe, south of Plainview.

These silos are to be cyprus, while the metal varieties are the favorites in the north side of the county. It is thought that the introduction of silos will revolutionize the agricultural, dairying and stock raising industries of Hale county.

## MINER IS KILLED IN A MINE CAVEIN

Troopers of Fourth Cavalry Raise Fund for the Child's Parents.

Bisbee, Ariz., April 11.—Cochise county's big automobile is saving money for the county every day, and it is believed by sheriff Wheeler that the machine will soon pay for itself in railroad fare saved the county. The sheriff is keeping a log of the trips of the machine and at the end of the year will total the saving. On a recent trip \$34 was saved in one day. This is the only official county automobile in the state of Arizona.

R. H. White, a miner at the Sacramento shaft, was accidentally killed by a cavein. He came here eight months ago from Ishpeming, Mich., and the body was sent to that place. He leaves a wife and two children at Ishpeming. He was a member of the Sons of St. George and the Knights of Pythias.

The cavalrymen of troop H, of the fourth cavalry, have made up a purse of \$55 and forwarded it to Mr. and Mrs. Engenio Cappa, of this city, as a token of their sympathy on account of the death of little Maria Cappa, who was recently run down and killed by a mounted trooper off duty. The trooper, Hans Hansen, is in jail at Tombstone, awaiting trial.

RICHARD CROKER AS HE IS TODAY

New York, N. Y., April 11.—Richard Croker, who, as head of Tammany hall, was the political czar of New York city, gave out an interview on the political situation before sailing for his country place, Glencliff, near Dublin. Among other things, the old boss declared that he thought that Roosevelt was done for politically and that Taft would surely be elected. He would not commit himself as to who he thought would be the choice of the Democratic party, but declared: "The Democrats will have to settle solidly behind their candidate if they want to win."

## OFFICERS PURSUE GANG OF OUTLAWS

Santa Fe, N. M., April 11.—Word comes from Lincoln county that deputy sheriff Patrocino Carillo, of Carrizozo, was shot through the stomach while pursuing Miguel Luna, who escaped from Lincoln all, where he had been confined for shooting Manuel Aragon. Five other outlaws are with Luna and mounted policemen Alexander Street and Rafael Gomez have joined in the pursuit. Sheriff Porfirio Chavez

has also organized a posse that will scour the Capitan mountains for the outlaws.

IN THE FAR EAST. Fair voyagers—Why are we sailing along here with the flags at half mast? Captain—"Out of respect for the Dead sea, ma'am."

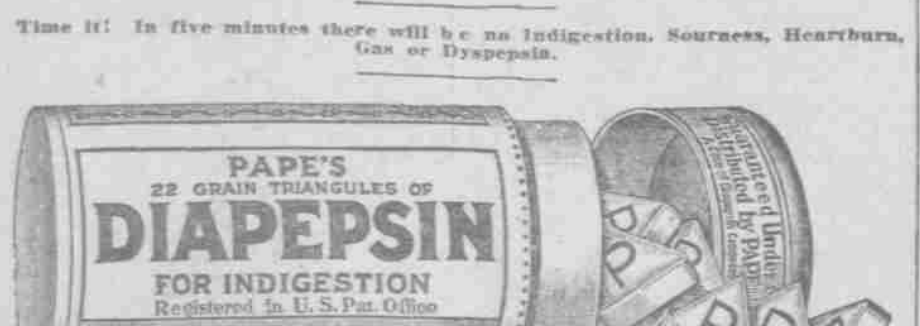

## HAPPY THO' MARRIED?

There are unhappy married lives, but a large percentage of these unhappy homes are due to the illness of the wife, mother or daughter. The feelings of nervousness, the befogged mind, the ill-temper, the pale and wrinkled face, hollow and circled eyes, result most often from those disorders peculiar to women. For the woman to be happy and good-looking she must naturally have good health. Dragging-down feelings, hysteria, hot-flashes or constantly returning pains and aches—are too great a drain upon a woman's vitality and strength. Dr. Pierce's Favorite Prescription restores weak and sick women to sound health by regulating and correcting the local disorders which are generally responsible for the above distressing symptoms.

"I suffered greatly for a number of years and for the past three years so bad that life was a misery to me," writes Mrs. R. F. Dickerson, of Ulica, Ohio, Route 4. "The doctors told me I would have to go to hospital before I would ever be better. A year ago this winter and spring I was worse than ever before. At each period I suffered like one in torment. I am the mother of six children. I was so bad for five months that I knew something must be done, so I wrote to Dr. R. V. Pierce, telling him as nearly as I could how I suffered. He outlined a course of treatment which I followed to the letter. I took two bottles of 'Favorite Prescription' and one of 'Golden Medical Discovery' and a fifty-cent bottle of 'Smart-Weed,' and have ever since much more health than I could tell every suffering woman the world over what a boon Dr. Pierce's medicines are. There is no use wasting time and money doctoring with anything else or any one else."

The Medical Adviser by R. V. Pierce, M. D., Buffalo, N. Y., answers hosts of delicate questions about which every woman, single or married ought to know. Sent free on receipt of 31 stamps to pay for wrapping and mailing only.

## IF YOU CAN'T GET YOUR STOMACH REGULATED, EAT A FEW DIAPEPSIN.

You don't want a slow remedy when your stomach is bad—or an uncertain one—or a harmful one—your stomach is too valuable; you mustn't injure it with drastic drugs.

Pape's Diapepsin is noted for its speed in giving relief; its harmlessness, its certain unfailing action in regulating sick, sour, gassy stomachs. Its million of cures in indigestion, dyspepsia, gastritis and other stomach trouble has made it famous the world over.

Keep this perfect stomach doctor in your home—keep it handy—get a large fifty-cent case from any drug store and then if anyone should eat something which doesn't agree with them; if what they eat lays like lead, ferments and sours and forms gas; causes headache, dizziness and nausea; eruptions of acid and undigested food—remember as soon as Pape's Diapepsin comes in contact with the stomach all such distress vanishes. It's promptness, certainty and ease in overcoming the worst stomach disorders is a revelation to those who haven't tried it.
